Note There are many online hypnosis courses that are crap, to put it plainly. Igor Ledochowski would be the authority on the latter and I advise looking at his hypnosis course. Suggestion and Misdirection - Ok so you have your "subject" in a relaxed state and they are open to suggestion. Well good work because I did the same thing and I came across the power of conversational hypnosis. It's all about using a person's thinking process against them which forces them to question their decisions and in this way you can use your own suggestions to persuade them. As human beings we like to complain but we never want to confirm that our "wants" will never happen so this will force the person to question themselves and try to find a solution. 9 speed hypnosis Your asking what the heck speed hypnosis well it's exactly what you think it is... being able to hypnotise someone quickly. It's a social skill. Beware of sites that do not give summaries and only give a PDF download. If you are looking for cheap help then consider self hypnosis. Beware of sites that do not give summaries and only give a PDF download. The theories and principles behind it came originally from Milton Erickson who did not believe in using hypnotic inductions and used conversations to persuade their subjects. For example, they may need a summary of Roberts rules or a simple summary of Macbeth to help them write a research paper, and a book summary website will help them achieve that goal. So now that you have confirmed their great idea and they are feeling good about how clever they are they will go through with it because they do not want to look stupid. E.g. smoking, obesity, procrastination, confidence etc... Short vs. He did not believe in using hypnotic inductions but instead used confusion techniques, analogies and forced his subjects to question themselves. You do not want to just say what you want them to do but to lead the conversation in a direction towards your suggestion. Example: Your children sound amazing and it's so important to plan their 8 future isn't it... If only my parents had got some professional advise to plan my future it would have made such a difference. Common religious beliefs are testimony to this where billions of people around the World stubbornly believe that they will receive the greatest rewards because they believe in their faith that has no substantial fact to back it up. Some of the bloggers and website owners also provide video and audio summaries, as well. Subscription Services and Book Apps It's possible to find chapter summaries of books available through subscription services, as well as book apps. This goes back to our brothers the apes where they will fight over the biggest banana because they are afraid that there will never be such an amazing banana again. The way it works is that you can meet a complete stranger and in one conversation convince them to do what you want with them realising. This persuasion technique can be used in a sales pitch, picking up someone in a bar/club, convincing anyone to do anything really. This boils down to what you want to learn or if you want help. So if something is perceived to be amazing and there is a limited opportunity to experience this then our reaction is to gain access to this before others do. If you are looking for more of a one on one persuasion then conversational hypnosis is the art of using no hypnotic induction at all and using analogies, double binds and confusion techniques to influence your subject. Some present notes, reflections, and reviews that their readers can comment on, discuss, or reflect on. So now you have to make this person questions themselves so what you do next is confirm their negative reasons to a degree where it is ridiculous and there is no hope. Your partner mentions spending a lot of money, you do not really have, on fine dining that night. You don't have too much money in your pocket to fork out for ongoing lessons. Some basic conversational hypnosis techniques Hypnosis is about understanding our thinking patterns (neuro-linguistic programming) so that we can use common triggers to change our perception. You can probably relate to this when you are lying on the beach with your partner and soaking in some sun. I will give an example below to make it easier to understand.) Conversational hypnosis example - convincing someone to go on a holiday So the beginning is hearing about the persons problems as to why they can not go on a holiday such as; to busy, not enough money, wrong time of year, do it another time if they will ever get the time off. They will start to figure out that they have some leave saved up and also have a little savings that they can use so it is actually quite a possibility. The best way that I can relate this is to the famous Star Wars reference of Obi Wan "you don't need to see his identity papers" and the storm troopers response was, "we don't need to see his identity papers." Is it possible to have a conversation with someone and hypnotise them there and then, the answer is yes. Because everyone is pressed for time, the need to look up the summary of this book or that one is sometimes a priority. Hypnotic inductions are a common way to prepare someone to be hypnotised. This has been passed on by present day hypnotherapist Igor Ledochowski who is now the authority on conversational hypnosis. This has become a very common style of hypnosis because it can be used in business/sales/personal situations. This involves putting someone into a relaxed state where their mind is more open to suggestion. At the moment the most influential speed (conversational) hypnotist is Igor Ledochowski. Conversational hypnosis is speed hypnosis Conversational hypnosis is specifically designed to be used to influence someone in the course of a conversation therefore making it the best way to learn speed hypnosis. Why do we keep falling for the same technique As human beings we always want to believe that there is always something bigger and better no matter what the facts point to. Have a look at this website for a review of the best course for you. This is perfect for sales situations, business proposals, public speaking (if you are good), and dating. 3 Difference between Hypnosis and hypnotherapy Basically hypnosis is the act of influencing someone to react to your suggestions, hands down! It has some audio CD's and it is a downloadable course that you can get, and more importantly it works. It helps to open your mind and allow your therapist to find deep psychological "scars". However when an Ad for something that they are interested in is shown (holiday) they change their tune and again fall for the "fear of Loss" technique. Conclusion This persuasion technique is one of many that is used on us and always gets results. The answer is that our thought patterns have been developed from birth to want the "shiny toy". I am sure you can relate to this because we have all either heard this phrase or said to someone before and then struck with the fear that we will miss out on this amazing experience. At the end of the day we want to believe so our minds will create a conclusion that what we are being told has to be true because we want that amazing opportunity to benefit us. Once these "scars" are found then the work starts to heal them and give a permanent cure to your condition. Background This unorthodox form of hypnosis was originally created by therapist Milton Erickson who dealt with war veterans post WWII and post traumatic stress. Learning these persuasion techniques So if you want to learn how to persuade pretty much anyone you want then you should definitely check out the "power of persuasion" or the "power of conversational hypnosis". Push this experience until you get a reaction out of them that is a smile and how it brings back great memories. Hypnotherapy - This is your long term.
